

# Action 1: Develop Shared Data Systems

## Basic Needs for Health and Safety

### What is the action?

Develop shared data, metrics, and learning tools across health and community access points.

### Why does it matter?

- Shared data reveals real community needs, not assumptions.
- Shared data builds trust, collaboration, and collective ownership.
- Standardized tools enable earlier action and reduce duplication.
- Shared metrics support accountability, alignment, and progress tracking.

### What does it take?

#### Shape Policy and Systems

- Adopt shared metrics and definitions.
- Establish inclusive data governance.
- Implement shared data-use standards.

#### Resource and Sustain the Work

- Invest in shared data infrastructure.
- Fund participation across under-resourced communities.
- Support technical assistance and adoption.

#### Implement, Operate and Build Capacity

- Use shared indicators across programs.
- Integrate shared tools into workflows.
- Reduce participation barriers for partners.

#### Generate and Use Data and Evidence

- Align data with common metrics.
- Contribute to shared learning systems.
- Share findings across sectors.

#### Engage Communities and Build Partnerships

- Share decision-making with communities.
- Strengthen cross-sector learning partnerships.
- Align partners around shared goals.

#### Communicate and Shift Narratives

- Tell stories using shared data.
- Share lessons and promising practices.
- Build support for shared accountability.

### How could we measure progress?

- Number of organizations using shared metrics or indicators.
- Number of partners participating in shared data or learning networks.
- Percentage of regions using common data definitions and tools.
- Number of decisions, plans, or funding investments informed by shared data.

# Action 2: Embed Community Health Workers into Team-Based Care

## Basic Needs for Health and Safety

### What is the action?

Embed Community Health Workers (CHWs) into team-based care.

### Why does it matter?

- Improves referrals and care navigation.
- Reduces system friction and gaps.
- Addresses needs before crises occur.
- Connects more people to supports.
- Expands community engagement in care.

### What does it take?

#### Shape Policy and Systems

- Standardize CHW roles statewide.
- Support CHW certification pathways.
- Expand CHW reimbursement options.

#### Resource and Sustain the Work

- Invest in long-term CHW funding.
- Support CHW pilot implementation.
- Fund statewide training infrastructure.

#### Implement, Operate and Build Capacity

- Embed CHWs within care teams.
- Establish referral workflows.
- Clarify CHW supervision and responsibilities.

#### Generate and Use Data and Evidence

- Measure outcomes from CHW

integrations.

- Demonstrate value through pilot results.
- Share effective CHW models statewide.

#### Engage Communities and Build Partnerships

- Partner with community-based CHWs.
- Strengthen health-community partnerships.
- Advance CHW-led community engagement.

#### Communicate and Shift Narratives

- Champion CHWs as care partners.
- Promote successful CHW integration models.
- Build support for CHW investment.

### How could we measure progress?

- Number of CHWs integrated into care teams.
- Number or percentage of completed referrals supported by CHWs.
- Number of organizations implementing CHW referral and care coordination workflows.

# Action 3: Sustain Health Care-Led Approaches

## Basic Needs for Health and Safety

### What is the action?

Support policy and financing strategies that sustain health care-led approaches.

### Why does it matter?

- Builds a stronger, more sustainable workforce.
- Keeps successful approaches working long-term.
- Helps people access the support they need.
- Reaches communities often left behind.

### What does it take?

#### Shape Policy and Systems

- Advance reimbursement and payment pathways.
- Champion supportive policy changes.
- Align policy across sectors.

#### Resource and Sustain the Work

- Invest in long-term financing solutions.
- Expand sustainable funding mechanisms.

#### Implement, Operate and Build Capacity

- Support health care-led approaches locally.
- Scale approaches that demonstrate value.
- Strengthen regional backbone capacity.

#### Generate and Use Data and Evidence

- Measure return on investment.
- Use data to demonstrate value.
- Share evidence from local successes.

#### Engage Communities and Build Partnerships

- Build coalitions for policy change.
- Engage community voices in advocacy.
- Strengthen cross-sector partnerships.

#### Communicate and Shift Narratives

- Promote a shared statewide narrative.
- Frame investments around avoided costs.
- Highlight successful local models.

### How could we measure progress?

- Number of organizations with ongoing funding for health care-led approaches.
- Number of reimbursement pathways, policies, or financing mechanisms supporting this work.
- Number of regions implementing health care-led approaches beyond pilot funding.
- Number of cross-sector partnerships or coalitions sustaining efforts over time.

# Action 4: Leverage Broad Cross-Sector Partnerships

## Basic Needs for Health and Safety

### What is the action?

Leverage broad, cross-sector partnerships to increase awareness, build shared understanding, and advance coordinated action.

### Why does it matter?

- Strengthens partnerships and shared ownership.
- Reduces silos across systems and sectors.
- Expands reach across communities and regions.
- Improves access through coordinated support.

### What does it take?

#### Shape Policy and Systems

- Align partners around shared goals.
- Engage partners early and often.
- Create clear pathways for participation.

#### Resource and Sustain the Work

- Invest in partnership infrastructure.
- Strengthen regional partnership networks.

#### Implement, Operate and Build Capacity

- Use existing partnership networks.
- Expand cross-sector awareness efforts.
- Integrate partnerships into daily work.

#### Generate and Use Data and Evidence

- Share examples of successful partnerships.

### How could we measure progress?

- Number of cross-sector partners actively participating in coordinated efforts.
- Number of communities represented in partnership decision-making processes.
- Number of collaborative initiatives launched or sustained across sectors.
- Percentage of partners reporting alignment around shared goals and messaging.

- Measure partnership reach and impact.
- Use results to strengthen collaboration.

#### Engage Communities and Build Partnerships

- Center community voices in decisions.
- Partner with trusted community leaders.
- Engage partners beyond healthcare systems.

#### Communicate and Shift Narratives

- Promote a shared statewide narrative.
- Use consistent messaging across sectors.
- Share locally relevant success stories.
